

Innovation is the key to success in audit

When it comes to delivering an audit, quality is KPMG's top priority. Our audit professionals' foremost responsibility is to serve investors, the capital markets, audit committees and management with reasonable assurance.

audit.kpmg.us

KPMG recognizes the value behind our auditors' skills, the value each person brings to the audit practice and to companies we audit. We are focused on empowering our auditors and providing them with a fulfilling and dynamic career characterized by continuous learning, innovation and opportunities.

Enhancing audit quality with innovation

KPMG is committed to continuously identifying and implementing innovative approaches and tools to help deliver and enhance a quality audit. We are making a significant investment in innovations that enhance audit quality, bring greater relevance to audit findings and ultimately enrich the client experience.

Introducing KPMG Clara

KPMG Clara is KPMG's next generation audit platform which is designed to facilitate more seamless and transparent interactions between you and your engagement team. This secure online platform offers a centralized portal that serves as a single source for the exchange of important information including valuable insight into the status of your audit.

Our professionals are provided with an opportunity to explore the application of new audit tools and technologies:

Robotic Process Automation (RPA)

Blockchain

Drones

Natural Language Processing (NLP) Technology

Strategic relationships, innovation and technologies

Through research, development, and strategic relationships with leading technology companies such as Microsoft and IBM Watson, KPMG is pioneering significant enhancements to our audit methodology. We are exploring how technologies such as artificial intelligence and robotic process automation can be adapted to the audit.

Audit powered by D&A

KPMG's D&A capabilities, combined with our deep knowledge of business and industry, enable us to filter, visualize, analyze, and extract information from data in ways that were not previously possible.

Cognitive Technology

KPMG has an exclusive agreement with IBM Watson cognitive computing technology to pilot the development and testing of Audit processes which will raise the bar on quality and create exciting new opportunities for our audit professionals.

Audit Garage

To keep up with the rapid pace of change and challenge our professionals, KPMG is leveraging an approach called the "Audit Garage" that encourages creative thinking that can help our innovation journey.

300+

KPMG innovation and D&A champions serve as resources for audit engagements

Talented professionals like you are critical to our success:

Combining knowledge and skills with leading-edge tools and technologies strengthens our ability to deliver a robust and relevant quality audit. We invest significant time, energy and funds into developing our audit professionals. To keep pace with the evolving operating environments, we provide blended learning curriculums that bring together technology-based training options with immersive in-person classroom experiences.

Building a world-class learning culture

The KPMG Lakehouse is a new learning, development, and innovation facility:

Dedicated training campus- unsurpassed learning environment and experience for continuous growth which will help professionals develop invaluable career skills. <https://info.kpmg.us/kpmg-lakehouse.html>

Master of Accounting with Data and Analytics Program:

First of its kind innovative program from KPMG and leading business schools combining learning + funding + doing to develop accountants in the data age. The powerful combination of D&A focused accounting curriculum and real-world experience is critical to preparing a select group of students for career success. kpmg.com/us/masters
